

## Plantinfo

Just add water and sun

## Plant guide

Find a pot with drainage and fill with potting soil.

Plant your pencil at a 30° angle, covering the seed capsule with soil.

Water regularly and in 1-4 weeks, your plants will sprout.

| Basil         Ocimum basilicum         6-10 days         Easy         Temperate, subtropical & tropical climate from the spring. Plant in gree or garden after the last frost.         Start indoors all year round. Can be ke indoors all year round. Can be ke indoors all year round. Can be ke indoors all year round or planted in a greenhouse after the frost.           Chia         Salvia hispanica         10-21 days         Medium         Temperate, subtropical & tropical climate         Start indoor in the spring.
